Cool Max t-shirt is made up of polyester fabric. Cool max polyester ensures performance power with its strength and durability coupled with breath ability.

Cool max is a high-performance, microfiber, polyester fabric that moves sweat away from the body and to the fabric surface, where it evaporates. Custom Design t-shirts are also very popular among corporate for promotional, gifting or advertising wear printed with their product picture or company logo.

Branding can be done with sublimation printing on lighter garment, Screen print, embroidery and vinyl.

# CUSTOMIZATION PROCESS

BULK CUSTOMIZED T-SHIRT  
COLLEGE PRINT T-SHIRT

COMPANY LOGO  
PHOTO PRINT

You've got the office. You've got the website. You even have the legal docs. But everybody knows that you're not a real company until you have your own company t-shirt. Company tees are a long-standing tradition traced back to 1950s. Today, the business t-shirt is still just as practical, offering lots of benefits to companies big or small.

## 1. Figure out why you need t-shirt?

There's no shortage of reasons to want a company tee. These business t-shirt goals will guide your design process by helping you understand why you need a t-shirt and what you want it to do.

### Following are some of the reasons behind customization of t-shirt:

- **Promotion-** Promotional business t-shirts are something you give away for free to keep your brand in the minds of prospective clients and customers. This makes everyone wearing your t-shirt a walking advertisement. On enough people, your t-shirts could generate buzz and create first impression of your brand, especially when coupled with a powerful image.
- **Meetings-** For meetings with potential clients, investors or partners, a company t-shirt is the perfect souvenir to remind them later how great you are.
- **Brand Values-** A Logo/ Tagline or a picture is worth a thousand words, which makes business t-shirts the perfect elevator pitch. Through strategic visuals and only a handful of text, a solid t-shirt design tells the world what your brand has to offer.

- Internal Solidarity- Like uniforms except more fun, company t-shirts help build a sense of community among workers within a company and that goes double if they give input on what it looks like.
- Merchandise- If your designs are appealing enough, you can sell your t-shirts as merchandise for a little extra company income.
- Events- Whether you're organizing a public promotional event or an internal retreat, event t-shirts generate team spirit and act as a nice memento to keep you fresh in prospective partners' minds.

## **2. Define your budget, quantity and timeline**

As with most projects, start your business t-shirt design process by figuring out a few specific details.

- Quantity: How many do you need?
- Budget: How much can you spend?
- Timeframe: When do you need the t-shirts?

## **3. Know your fabric and colour options**

There are multiple options available for the fabric. Basic day to day fabric such as cotton, polyester, lycra, polycotton, waffle, fleece, looper knit is readily available. Other options for fabric as well colour can be made available depending again upon the quantity and time frame.

## **4. Know your printing/ branding options**

Sifting through printing methods is where a lot of would-be t-shirt designers get lost. There are several different ways to go about it, and the technical issues can be intimidating unless you know what they mean. Here are the four most effective t-shirt printing methods and the best times to use each.

- Screen Printing
- Direct to Garment
- Vinyl graphics
- Embroidery

## **5. T-shirt types**

If you haven't already, you need to decide what style of t-shirt to use: crew neck, V-neck, long-sleeved, short-sleeved, crop tops, polo, and many others.

## **6. Evaluate your design**

Whichever route you take, you'll evaluate the final design before taking it to the printers. It may even help to do multiple versions so that you can select your favourite when viewing them side-by-side.

Consider more than just the visuals. This is a business endeavour so your final design should meet all your business goals.
